ENHANCEMENTS

FACE

Cryo Eye-Contour

The ultimate add-on to a facial treatment that focuses on plumping, rehydrating and nourishing the delicate skin on and around the lips.

Radiofrequency

Highly effective tightening procedure. It works best against loose and sagging skin, lines, and wrinkles. Radiofrequency is pain-free and helps achieve rejuvenating results on the face.

Eye-Lifting Mesotherapy (Needless)

Eye Lifting Mesotherapy is a method of replenishing cells and promoting healthier skin around the eyes. This is done by inserting vitamins and nutrients into the cells using ultrasound waves. This treatment nourishes skin cells, stimulates blood flow, improves lymphatic drainage and it encourages collagen and elastin production.

Oxygen Infusion Therapy

Ideal for stressed and dehydrated skin. This treatment oxygenates the cells, making your skin look flawless and silky-smooth.

Dermaplaning

It removes all the dead skin cells and also the facial hair, leaving the surface very smooth. Dermaplaning also allows for greater penetration of skincare products and creates a flawless canvas for makeup to glide on smoothly.

Chemical Peel

Chemical peels work by exfoliating the skin's surface to reduce the appearance of blemishes, smooth skin texture, improve radiance, and restore skin health. They are most effective at enhancing cell turnover and improving the appearance on the surface of the skin.

For the ultimate experience, our skincare experts will determine which peel is right for you.

Lip Plumping

The ultimate add-on to a facial treatment that focuses on plumping, rehydrating and nourishing the delicate skin on and around the lips.

BODY

Pressotherapy

Pressotherapy is a procedure that is said to help with lymphatic drainage, thereby potentially slimming the look of the arms and legs (because they carry less fluid), easing aches and pains, and detoxifying the body.

Radiofrequency

Radiofrequency gets through your skin layers and selectively heats the skin tissue where collagen fibres are rooted. The heating causes a contraction of collagen fibres, shrinks fat cells and stimulates fibroblast cells to produce elastic fibres and collagen. The result is a smooth, tight and youthful looking skin. Stubborn cellulite is less noticeable and fat cells are reduced.

Needle-free Mesotherapy

This collagen induction therapy reduces the appearance of stretch marks and scars, removes unwanted fat, contours the body, and tighter, smoother skin.

Cryo Body Slimming

Cryo Body Slimming is a localised fat loss treatment which passes fat debris from the body via the lymphatic system through the naturally occurring process of apoptosis. This treatment is an ideal choice for anyone looking to lose inches or deal with stubborn pockets of fat that do not improve with diet and exercise alone.

CBD

The treatment uses heat to loosen muscles, and layers in warming CBD oils. Massage specialists target pressure points and alleviate tension with CBD, leaving you with a lasting sense of relaxation.
