BIOLOGIQUE RECHERCHE LAUNCHES NEW SERUM IN THE U.S.

(Orlando, FL) Biologique Recherche presents its latest innovation, Collagène Originel Serum. The serum acts on the 4 main types of collagen to redensify the skin in 3 dimensions and to fight established wrinkles. A first in cosmetics, it contains at its core Type-0 Collagen, a patented Biologique Recherche active ingredient.

This breakthrough discovery is the result of many years of research in the medical field. Biologique Recherche conducted studies on this collagen, which has unique properties, before developing its own patented active ingredients. To perfect the formulation, Biologique Recherche added three carefully-selected active ingredients to this Quintessential Serum for their effects on the main types of collagen.

Benefits of Biologique Recherche's Collagène Originel Serum include the stimulation of collagen at the gene and protein levels, boost of collagen I, III, IV and VII, reduction of wrinkle length and limitation of the appearance of any new wrinkles. Collagène Originel Serum comes in two sizes, 8ml and 30ml bottles.

Biologique Recherche's Collagène Originel is available for purchase at Opulence Glamour Skin Clinic since October 10th, 2022.
